nikhil-j-ram

nikhilj4

Final-year B.Tech (AI & ML) engineer building production-grade AI — RAG-powered SaaS chatbots, multi-agent ERP automation, healthcare assistants, and voice/Telegram AI agents. Hands-on with LLM orchestration, hybrid retrieval (BM25 + Semantic + Vector), and FastAPI deployment. Driven by shipping scalable, low-latency AI for real business problems.

EXPERIENCE

AI / ML Intern • Haystek Technology

Present • Hyderabad • Hybrid

- Built **Webchat LumyBot** — scalable SaaS chatbot on FastAPI with Hybrid RAG (BM25 + Semantic Search + Vector embeddings) for context-aware retrieval.
- Engineered **ERP LumyBot** — Multi-Agent AI ERP assistant with RAG knowledge retrieval, conversational memory, and intelligent query routing for enterprise automation.
- Optimized retrieval latency, response generation, and LLM orchestration for production SaaS deployment workflows.

AI / ML Intern • Avijo

Aug – Oct 2025 • Remote

- Developed an AI healthcare chatbot using **BioBERT**, **RAG**, **LangChain**, and LLMs for personalized medical conversations.
- Integrated **EasyOCR** to parse uploaded medical records and deliver tailored health insights via a virtual assistant interface.

Summer Intern • Microsoft (Edunet Foundation)

May – Jun 2025 • Remote

- Built an AI system predicting job salary and role from user skills & experience; benchmarked XGBoost and Random Forest models through an interactive interface.

PROJECTS

Telegram Job Bot • N8N Automation for Job Seekers

2025

- End-to-end Telegram automation built on **N8N** — scrapes, filters, deduplicates, and pushes curated fresher openings to subscribers in real time; live community of active job seekers.

AI Outbound Calling Agent • Voice AI • +91 80487 99687

2025

- Fully autonomous voice agent using **N8N**, **Vapi**, **ElevenLabs**, **OmniDimension** with real-time STT/TTS and conversational LLM routing for lead qualification & outreach.

VisualAid • Image Analysis for the Visually Impaired

Apr – Jun 2025

- Accessibility web app extracting text, generating image captions, and converting results to audio output for blind users.

Rose Crop Disease Detection • VGG16 Deep Learning • Real-time Diagnosis

Oct 2024 – Mar 2025

- Real-time disease detection via VGG16 with a web interface for instant leaf-image diagnosis and fertilizer recommendation.

TECHNICAL SKILLS

Languages	Python • Java • SQL
AI / ML	LangChain • Hybrid RAG (BM25 + Semantic + Vector) • LLM Orchestration • Multi-Agent Systems • NLP • Deep Learning • OpenCV • Scikit-Learn • BioBERT
Voice & Automation	N8N • Vapi • ElevenLabs • OmniDimension • EasyOCR
Backend	FastAPI • Flask • Node.js • REST APIs • Postman
DevOps / MLOps	Git • Docker • Azure • Vercel • CVAT
Web & Data	Next.js • Tailwind CSS • HTML / CSS • Vector Databases • SQL

EDUCATION

GITAM Deemed University • B.Tech, Computer Science (AI & ML)

Aug 2022 – Aug 2026 • Bengaluru

Coursework: Data Structures & Algorithms • Operating Systems • DBMS • Design & Analysis of Algorithms

AWARDS & RECOGNITION

Smart India Hackathon 2025 • National Finalist — Top 5 Teams

KIET, Delhi NCR • Dec 2025

- Led team to build a scalable data-analysis solution for the **National Investigation Agency (NIA)** to process suspect mobile & digital device datasets; presented at the National Finals, New Delhi.

BioMed Bharat 2024 Hackathon • Runner-Up • Team Lead

AMTZ, Andhra Pradesh • Mar 2024

- Led team to design & prototype (TRL-3) a "Shield to reduce discomfort/pain during IM injection."
